

Cantina
Ríó Covés

And grandfather returned from the Americas to his place, to the estuary of the river, after traveling the world and dedicating himself to the beautiful woods of the Tropic.

In the forties, in the old dry dock of the Covés River, our grandfather launched the last steamboat that would leave from there: The "Dos Amigos".

Years later, on the same pillars, his sons would build a house that for fifty years was a tobacconist, canteen and salt warehouse.

More than 20 years ago we have recovered the old family house, looking for the happy postcard of what was our childhood in the old Esteiro del Covés; to invite you to share a table with a piece of history of our land, the flavors of yesteryear with the use of traditional Galician products and a careful selection of recognized wines of the land.

Starters
